

10ft 2-way / 4-way Slave Pallets

Features:

- Rugged Construction
- Cost Effective
- 2-Way or 4-Way fork-tyne entry pockets
- GRC, Ball-Mat or Caster tops
- Mini slaves for AKE sized ULDs also available
- Reduces Damage to ULD Containers
- Easy to Relocate
- Compact Storage

Description:

Slave Pallets allow a more flexible and convenient system for the temporary storage and movement of ULD Cargo containers. The Slave Pallets can easily be moved about the warehouse floor by Forklift trucks, and stacked for storage when not in use. Slave Pallets are a useful workhorse addition to any Cargo Handling System.

Specifications:

Transfer deck surfaces:

- Ball Transfer Units – These allow the easy transfer of ULDs in any direction using low friction units.
- Heavy Duty Cargo Castors – Like the Ball Transfer Units these allow the easy transfer of ULDs in any direction but are more suited to Heavy duty environments.
- Gravity rollers -- These provide a simple bi-directional transfer of ULDs,

All Slave pallets are of a rugged Steel Structural Frame to maximize life, and primed and painted with two coats of enamel. Walking surfaces are supplied with a durbar patterned surface for Gravity Roller, and Castor Deck options. Ball Transfer Decks can be supplied with a non-slip 'gritty-painted' finish.

Specifications:
